EDUCATION

Bachelor of Science in Computer Science

Ateneo de Naga University 2022 – 2026

STEM

Ateneo de Naga University Senior High School 2020 – 2022

EXPERIENCE

Software Engineer Intern

Bureau of the Treasury Camarines Sur June – July 2025 Naga City

Keywords: Microsoft Power Platform, Power Apps, Dataverse, SharePoint, Software Development

- Designed, developed, and deployed a transaction management system using the Microsoft Power Platform to support and streamline the agency’s transaction tracking and management workflows.
- Built user interface and data workflows using Power Apps for processing transaction information and related files.
- Integrated structured data and file management using Dataverse and SharePoint to support end-to-end transaction processes.
- Translated client requirements and established workflows into functional system features based on project objectives.
- Collaborated with team members to maintain consistency across adjacent systems.

PROJECTS

Medical Appointment System

- Designed and developed a web-based appointment scheduling interface designed to streamline appointment management and processes for patients and medical practitioners.
- Used HTML, CSS, and JavaScript in implementing role-specific dashboards, authentication interfaces, and appointment scheduling functionalities.
- Integrated a third-party calendar library to support interactive appointment scheduling and calendar management.
- Collaborated with team members to ensure system compatibility and alignment with requirements.

AI-Powered Educational Game Platform

- Implemented a reinforcement learning model into a game-based learning platform designed to assist local grade-school students in practicing mathematical operations.
- Trained a Proximal Policy Optimization algorithm via Stable-Baselines3 for the dynamic difficulty adjustment model.
- Designed and developed the simulation environment and reward design for the training processes.
- Integrated the AI model into the Unity-based game to enable the adaptive functionalities.
- Collaborated with team members to ensure proper integration with the game logic.

Steam User Analytics Platform

- Designed and developed a full-stack web application that retrieves and analyzes Steam library and activity data to provide users with personalized account statistics.
- Developed a React front-end for the user authentication and analytics content interfaces.
- Developed RESTful back-end services using ASP.NET Core Web API to process application requests and data management.
- Utilized PostgreSQL through Supabase for the application and user data management.
- Integrated the Steam Web API for user data retrieval and processing.

School Chatbot System

- Designed and developed a web-based chatbot interface designed to assist students with the technical processes and procedures within the university.
- Implemented the interfaces using HTML, CSS, and JavaScript for the user authentication and dynamic UI components for real-time chat interactions.
- Collaborated with team members to ensure front-end and back-end compatibility.

TECHNICAL SKILLS

Front-End Technologies

React • Tailwind CSS • TypeScript • HTML5 • CSS3 • JavaScript

Back-End Technologies

ASP.NET Core • Supabase • PostgreSQL

Languages

C# • Python • Java • C++ • C • SQL

Tools & Platforms

Git • Visual Studio Code • Figma • Unity
